

## Error about not able to update a query in the MS Database in Nutritionist Pro desktop application

1. This image below is seen when clients do not have full rights to the folder and our database and are not able to save or edit the db. Give the user all rights and the issue should be resolved.
2. To give the user all rights
  - a. From the C drive give rights to Axya Systems, and Nutritionist Pro folder by right clicking and selecting properties.
